Davis County

NOTICE

A Notice of Intent for the following project submitted in accordance with §R307-401-1, Utah Administrative Code (UAC), has been received for consideration by the Executive Secretary, Utah Air Quality Board:

Company Name: Hill Air Force Base

Location: Hill Air Force Base: Main Base – 75 CEG/CEV, 7274 Wardleigh Road, Hill Air Force Base, UT, Davis County

Project Description: Hill Air Force Base (Hill) has requested a modification to their Composite Core Approval Order DAQE-AN010210199-10, to replace an existing baghouse with a more efficient baghouse. This operation is located in building 238 on the main base. The emissions from this permit only contain the PM₁₀ and PM_{2.5} emissions from the baghouses which control the 5-axis routers and cutting operations in building 238. Replacing the baghouse with a more efficient baghouse reduces the emissions by 0.44 TPY of both PM₁₀ and PM_{2.5}. The composite core process baghouses in building 238 have the total potential emissions of 0.87 TPY of PM₁₀ and 0.87 TPY of PM_{2.5}.

This Approval Order is not subject to any current New Source Performance Standards and is not subject to the National Emission Standard for Hazardous Air Pollutants for Aerospace Manufacturing and Reworking Facilities. Hill is classified as a major source of air pollution and subject to the Operating Permit Program. Hill is a SIP-listed source, a major source for VOC, PM_{2.5} and PM₁₀, and a PSD source for NO_x and CO. The Title V permit will be administratively amended to incorporate the conditions of this Approval Order. Hill is located in Davis County which is a nonattainment area for PM_{2.5} and a maintenance area for ozone, but is an attainment area for other criteria pollutants. This Project requires a 30-day public comment.

The completed engineering evaluation and air quality impact analysis showed that the proposed project meets the requirements of federal air quality regulations and the State air quality rules. The Executive Secretary intends to issue an Approval Order pending a 30-day public comment period. The project proposal, estimate of the effect on local air quality and draft Approval Order are available for public inspection and comment at the Utah Division of Air Quality, 195 North 1950 West, Salt Lake City, UT 84114-4820. Written comments received by the Division at this same address on or before July 3, 2010 will be considered in making the final decision on the approval/disapproval of the proposed project. Email comments will also be accepted at tdanderson@utah.gov. If anyone so requests to the Executive Secretary at the Division in writing within 15 days of publication of this notice, a hearing will be held in accordance with R307-401-7, UAC.

Date of Notice: June 3, 2010
